Title:

Comments: It is unclear whether any of this work will be done in actual wilderness areas. Chain saws and vehicles close to wilderness make it NOT wilderness with sounds, smells, etc. Most dead trees are useful to the natural environment and should just be left, even burned ones, unless they are leaning over buildings in the non-wilderness area or endangering actual trails, again not in the wilderness. Of course, crosscut saws should be used for trail work in this area.
