Title:

Comments: There are wilderness area adjoining some of your mapped areas but it is unclear whether any of the hazardous tree management will be in wilderness areas.

The Forest Service needs to exclude all Wilderness areas from this project, including any encroachment from activity on wilderness boundaries.

Wilderness visitors should be allowed to experience nature on its own terms, including any risks that entails. Post warning signs at trailheads if necessary.

Dead and dying trees should be left alone in the Wilderness.

I oppose using chainsaws to clear trails in the Wilderness.

The Forest Service should only use crosscut saws, not chainsaws, to clear trails of only the fallen trees that must be removed.

Thank you for consideration of my concerns!
