Comments: The Forest Service needs to exclude all Wilderness areas from this project, including any encroachment from activity on wilderness boundaries. Wilderness means it takes care of itself, having been fine before humans arrived, logging and spreading disease . People who wish to experience wilderness must understand the risk that this entails. Trails may be cleared with crosscut saws, eliminating the noise that is not endemic to wilderness. Dead and dying trees should be left as shelter and food for animals, finally decomposing and enriching the soil.
