Title:

Comments: Though not explicitly cited it might implicitly be targeted: wilderness trees in their forests.

This missive is to request you leave wilderness trees alone. Let Nature attend to her ecosystem to clear & recycle in Nature's timing & design.

Our species is wonderful in many respects, but our ignorance & arrogance has also caused great harm to others within God's creation, of whom we are meant to be good stewards. Please use the authority of your position to be a good steward & leave wilderness trees to thrive & die without your intervention. Thank you. Wishing you & yours blessings...
