Comments: Regarding the Tree Management Project (Region 5), knowing fully the impacts of actions beforehand is crucial for the protection of wildlife and their homes. Habitat disruption and alteration are potentially threatening to the requirements that denizens of wilderness areas need to thrive. Jim Mason said, "We human beings surely need a better, healthier sense of who we are as a species and of how we ought to carry on among the other living beings of the world." We must learn to live in better harmony with the land, water and wildlife of wilderness.
