Comments: Dear National Forest Service,

I very strongly support the idea of protecting true wilderness in our designated Wilderness areas. Please do not interfere with all natural processes in our Wilderness areas, including removing SO-CALLED hazards! We MUST preserve some small parts of our planet in their truly natural state, for many reasons, some of which we may not yet know.

Please do not use chain saws to cut away any dead or living trees. Act as stewards on behalf of us all and leave Nature alone.

Thank you. I am not including my contact info because of all the warnings given about how it would be accessed by the general public.
