Comments: My family loves taking our Polaris SXS exploring..

I truly understand the need to protect the environment, but I also believe that existing roads and access should be maintained when ever possible for responsible use.

Please consider carefully the effect closing existing access has on peoples abilities to get out and enjoy what a wonderful heritage we have in our public lands.

Often the people pushing for these closures have not and will not recreate in the area, they just have an agenda to close all motor vehicle access to our forests and public lands.
