Comments: Wilderness should be left as it is. Today, there is a shortage of places that God made due to greedy corporations, companies, and persons. Don't we have enough fast-food restaurants, stores, parking lots, etc? However, what we DON'T HAVE ENOUGH OF is trees. It's trees (along with bees & other pollinators) that allow humans to live giving us oxygen, and helping to remove harmful pollutants. Now, more than ever, we MUST do everything we can to protect our one-and-only planet on which to live before we no longer do have a planet on which to live.
