Comments: My comments are tied to the natural world---I've always been tied to and believed in the positive side of our natural world and remain the same today! It's still my thinking that WE should identify and protect it....but we should ALLOW nature to a certain amount of having it's own way, too! We should be "natural fires to burn....unless we see them as threatening to human life and irreplaceable property. Under no circumstance should we be allowed to take mechanized equipment into a wilderness area.
