Comments: The Forest Service (FS) did not make any delineation for the Hazardous Tree Management Project (Region 5) in their proposal to cut and clear "hazardous" trees. The FS said nothing about Wilderness in Region 5. I strongly believe that the FS should not clear cut and remove dead trees in Wilderness areas.

The FS needs to exclude all Wilderness area and any encroachment activity on Wilderness boundaries. The Wilderness has long (millenium) taken care of itself. The FS does not have the right to disturb the Wilderness. If there is a risk for some hikers or public to venture into the wilderness, they are at their own risk. Signs of such should be posted at trailheads. Do Not Disturb the Wilderness areas in Region 5.
