Title:

Comments: As a Citizen, I require Public Agencies to conform to established laws and regulations, including those preserving National Wilderness Areas.

As a regular visitor of Wilderness Areas throughout Lassen, Plumas, Tahoe and El Dorado National Forests, I greatly appreciate what true wilderness yet elicits within it's whole environ and being. None else possess complete innocence among their own innate severity. Any evidence of mechanical presence destroys that entirely. Futile attempts to control natural processes defiles what only creation maintains.

Keep your chainsaws and helicopters out of, and well-away from, our Nation's remaining Wilderness. As an avid cyclist, that goes for bicycles and wheelchairs too. I love to backpack and do welcome mule riders.
