Comments: Hi, The use of our public land is growing in Gunnison valley. I'm not sure if you've heard the term, More people more Problems. I am a avid motorized user in the backcountry and live hear for it. I've lived here 18+ years and have seen the different type of people that move here and many people don't understand motorized vehicles are so useful here. They get us into these amazing places that you wouldn't even know existed without. I like how things are right now and know its not nessasary to change them. Just because people don't like the noise doesn't mean You need to shut things down. The noise and trails were here before them. They need to except it or live somewhere else. I agree with the plan C that keeps it the same. Thank you Tristan
