Comments: I understand the need to preserve the forest and land, but neglecting maintenance on roads that people have used for many decades is a safety issue for residents and visitors alike. Having lived in Yellow Pine in the 60's, and seeing with my own eyes this summer, the terrible condition of access roads, I am appalled by the situation.

Preserve the land, but don't put the public in harm's way just to save money. That mentality is destined to produce catastrophic results.
