First name: alison

Last name: gannett

Organization: Holy Terror Farm

Title:

Comments: Save our lands for future generations - for ALL to enjoy! I am specifically in support of the GPLI Community Proposal, which is much more specific than alternative D. Our farm relies on clean air, clean water, clean soil. The other alternatives will put our business in danger. We rely on tourism, and massive logging and liquid gas extraction is not compatible in many areas of the GMUG. I support the GPLI proposal, as I was involved as were hundreds of community members - this is a proposal not from the left or right, but from real people like myself. We all came together, from opposing backgrounds and found common ground after years of work. Hear our voices! I also created PLUG - "Public Land User Group" - of which the Forest Service, BLM, County and town staff were all a part of. We agreed that input from real people from diverse backgrounds should be given the highest regard for GMUG.
