Comments: Having been involved in the leadership that won the 1993 Law Suit against the Forest Service for its Practices on the Chattahoochee NF, and having followed this Landscape project for some time, I have drawn the conclusion that the USFS and not changed its tactics, nor its destruction of our Forests, nor the destruction of our waterways, which have gone up temperature wise by thermal warming I can't find a justification for this new project. It is the same old, same old! The old stuff under a new name. There is no reason whatsoever for the continuation of this project. It should be stopped. The forests will be raped; the trees will be destroyed; the mast crops will be lessened; the streams will be silted; and the Tax payer's monies will be wasted on a useless project. I believe the basic reason for this Landscape project is MONEY! And, to supply jobs in order to keep your people employed. We need absolutely no more forest devastation in Rabun County or within the State for any reason. I totally oppose this project. This Project should be stopped immediately!
