Comments: public comment on federal register

we need some road over/under passes so that wildlife can get across busy roads. i also think the following should happen at this area which you seem to want to turn into a people site, instead of saving any of it for the animal who live there full time. the 14387 acres need to be for nature.

1. stop all hunting and trapping on this site
- 2 no logging
3. no prescribed burning which causes lung cancer
- 4.no chemicals used roundup atrazine pfas so many others are killing americans
5. no new roads
6. no grazing or mining or drillingthis comment is for the public record. please receipt.
