Comments: I wanted to offer a few suggestions to the proposed project. First I don't believe that road restoration treatment is a good use of taxpayer dollars unless there is a definite problem area causing very negative environmental consequences, instead some of these old road beds could be reopened to UTV,ATV and two wheeled motorcycle use giving user groups with very few riding options a place to go. Most trails in the region being looked at are difficult and this option would add easier options for less experienced riders and families. I would like to see trail #092 log mountain reopened to 2 Wheel motorized as it would be a scenic out and back option.

I would also like to see the Parks Peak #069 trail, the Parks Peak cutoff #074 and Rainbow Ridge #070 trails reopened to 2 wheel motorized instead of their current non-motorized designation.

Thanks for giving the ability to comment on this proposal.
