Comments: Thank you for the opportunity to express my preferences for consideration as you go through the very important process of updating the GMUG Forest plan. My main overall concern is to express my desire for keeping the Grand Mesa Nordic Council ski trail system (which comprises a small portion of the total GMUG land area!) a non-motorized area for aesthetic as well as safety reasons. Therefore, alternative D is my preferred option going forward.

To this point, I would also request you correct the winter travel map so that the Ward Lake, County Line and Skyway trail systems are delineated as "Oversnow Vehicles Prohibited Seasonally" as opposed to the current "Analysed-Open to OSV" delineation.
