Comments: re Drone Prohibitions: While FW-STND-REC-09 (page 62) lists specific areas in which flight of drone and similar items are prohibited, it fails to address a key objective. The language should specifically include prohibition of all such flights within 0.25 miles of wildlife and wildlife/avian nesting and birthing areas. While humans may, or may not, understand drones, drone flights intruding on wild life can lead to panic, disturbance of birthing and nests, and otherwise constitute harassment, no matter how well intended to satisfy human curiosity.
