Title:

Comments: Thank you for the opportunity to comment. I support wholeheartedly the comments submitted by Great Old Broads for Wilderness, Colorado Native Plant Society and the High Country Conservation Advocates. I agree with their recommendations of new wilderness, greater protection of plants and animals with the minimum of logging, off-road vehicles and new roads and trails. I believe that the issues addressed by all of these organizations are most aligned with Alternative D, and urge you to adopt that alternative, with some adjustments, in the final plan.
