Comments: I would like to see an end to the privatization of the forest service lands on the grand Mesa. When private entities think they have authority to regulate my public lands it's disturbing. People trying to tell me I can't have my dog on public lands managed by the forest service that is a problem these people think that is their private property. People like the Nordic Council should be removed from any association with the national forest. If you were aware how many wetlands that they are destroying you would be concerned too. I have photos of them driving their private personal vehicles through delineated wetlands on the grand Mesa and yet they want to tell us how we can use our public lands.
