Comments: On page 24 of your document it reads:

To increase awareness, educate partners and visitors of the potential for pathogen transmission affecting native plants and animals (e.g., recreation pack goats and bighorn sheep, the need to decontaminate wading boots to reduce spread of chytrid fungus or whirling disease).

Since there is not one documented case of pack goats transmitting disease to Bighorn sheep, the statement "recreation pack goats and bighorn sheep" should be eliminated. This statement unfairly taints the reputation of pack goats and the pack goat community.
