Comments: I write in disgust of the final phases of this process. Thanks, large in part, to our currently corrupt and compromised federal government, our local and state USFS also choose to promote the lack of transparency and true public discourse for the final phases of this GMUG revision plan. A standing ovation to the Plandemic Hoax of COVID-19! Those of you still working for the US government who are not fighting for the people should be ashamed. That means you! You have facilitated the tyranny of a corrupt regime instead of standing up against it. You have shamed those brave enough to question. You went to zoom meetings where you could mute or choose not to listen to those opposing the philanthropist's and their foundations narrative. When it came to hearing the voices of the people you claim to serve, you mandated they put a covering over their face. You closed your office doors!

At this point the current United States government is null and void! The USFS can do whatever it wishes with this fiat revision plan, and like the fiat currency, it means nothing! I will continue to enjoy the public lands harmoniously with nature regardless of whatever boundaries and parameters the fake USFS thinks it can implement. This like every other thread of our federal government is a Sham!
