Comments: My family and I are big supporters and users of these magnificent lands in the GMUG NF. We enjoy hiking, biking, motorcycling and XC skiing in the forest. As such we support Alternative C as it appears to be the least restrictive and close to the current plan. We would support a couple of modifications to this alternative with protections for existing motorized routes and also continued access to the continental divide trail as listed in Alternative B. Also, we think the Grand Mesa Nordic trails should be classified as a special management area for XC skiing with no motorized travel during the winter months. Thank you for your attention.
