Comments: I am commenting on the GMUG winter travel plans.

As a 40+ year cross country skier & winter recreationist on The Grand Mesa I would like to support the maintainance of prohibiting oversnow vehicles within the Skyway, county Line & ward lake Trail systems, I would also like to maintain the status of prohibiting oversnow vehicles to the current boundaries on West Bench, Waterdog and Lake of the Woods areas.

Prohibiting oversnow vehicle usage in these areas provides a safer alternative for the non motorized user. This status also helps to maintain the pristine quiet outdoor experience.

I am looking for a special management area for non motorized use for cross country skiing

I would like the Skyway, County Line & Ward Lake areas to be non suitable for timber base"

I would like the winter travel trail map to be corrected to reflect these statements

Alternative "D" is the preferred Alternative

The Grand Mesa is a very large area with miles & miles of available motorized & mechanical opportunities for oversnow travel. I am asking for a few areas to continued to be set aside for the quieter seeker of pristine winter recreation.
