Comments: My wife and I live, recreate and own a business in the GMUG and very much want to see recreational opportunities in the forest continue. We enjoy dirt biking, hiking, Nordic and alpine skiing, hunting, snowmobiling and Jeeping. In addition, we own the Tomichi Creek Trading Post that is fully supported by tourists to this great area that enjoy all these activities and more including fishing and all types of off roading. We support Alternative C because it is the closest to current forest management, is the most flexible with less zoning restrictions and allows more management of the forest in the event of natural forces. We also strongly support modifications from Alternative B that protects motorized access to the Continental Divide Trail and areas around the trail. Thank you.
