Comments: I am asking the Forest Service to manage Kelso Mesa as lands with wilderness characteristics. I think the North Fork of Escalante Creek, and Kelso Creek deserve the wild and scenic designation because of their pristine nature - including the Dry Fork of Escalante Creek, because of the unique and breathtaking stand of tall Spruce trees. Although I can no longer access this area because of a spinal cord injury, I was once an avid hiker and getting out into these wilderness areas nourished my soul. Just knowing these places exist still nourish my soul. Please keep them unspoiled. I am also asking for my friends and future generations so they can continue to experience nature in its unspoiled form.
