Last name: frischmuth

Organization:

Title:

Comments: 1. Preserve Natural Quality

Keep ecological systems substantially free from the effects of modern civilization ie: clean water leaving the basin. Protect native grasses and wildflowers. Limit the number of hikers and backpackers. Protect a significant source of drinking water for residents on the south end of Log Hill Mesa

2. Untrammeled Quality

Preserve flora so that native trees, grasses, and wildflowers thrive. Reduce the number of overnight campsites in Blue Lakes Basin through a permit system and numbering and designating campsites

3. Opportunities for Solitude or Primitive and Unconfined Recreation Quality

Provide opportunities for solitude and a primitive and unconfined type of recreation
