Comments: I am asking the Forest Service to manage Blue Lakes to preserve its natural quality. Blue Lakes is an amazingly beautiful scenic area. I am saddened to hear from a friend that recently visited the area, that it is becoming overrun and trampled, even with areas where human feces is common. I hope that you can limit the number of hikers and backpackers. Please preserve the untrammled quality of this area so that native trees, grasses and wildflowers can thrive, and it can truly be enjoyed for its pristine qualities.
