Comments: Please do not allow Lutsen Mountain to develop this land. I believe this land will allow for more diverse use and less of a human foot print if Lutsen is not allowed to develop this area for skiing terrain. If wishes to invest and improve their current resort boundary there are many other ways to do this without clear cutting runs and building lifts. The land would bring MORE people to the area if it were advertised as backcountry ski terrain. Backcountry skiing is the fastest growing sector of the ski industry. I hope my childrens children will still be able to see this landscape undeveloped when they are my age.
