Comments: While I am not a resident of the valley, I have always appreciated and enjoyed the vast recreation areas and opportunities for all types (snowmobiling, dirt biking, etc) and would hate to see any loss of land use for any reason. I don't see any reason the public access land can't be shared and enjoyed as it currently exists. Limiting use for any reason is a slippery slope and difficult to regain, and it won't simply be lost recreation. The lost tourism revenue will affect local businesses as people (I potentially being one) vacation and recreate in other places that remain more available. Thank you very much for your consideration.
