Comments: Good Afternoon,

I'm a resident of Grand Junction Colorado and I am urging the forest service to limit winter usage of the areas containing the three ski areas I frequent during the winter season specifically the Skyway, County Line, and Ward trail systems. These trail systems are important as they are non-motorized trails that are family friendly and a great place to connect with nature. Keeping these trail systems as non-motorized is imperative as this is a safe place to take my daughter (who just turned two) and enjoy the winter. The quiet ambiance, snow quality, excellent grooming and trail conditions all allow my family and I to enjoy the snow and solitude. Allowing motorized usage during the winter season in this area would be a detriment. Please keep these regions designated as non-motorized. Thank you.
