Title:

Comments: I am a home owner in Gunnison County, living full-time in Crested Butte South, and have visited many areas affected by this proposed Forest Plan, including Almont Triangle, Brush Creek, Flattop Mountain, Fossil Ridge and Taylor Park. I hike quite often in these areas. I am concerned about increased backcountry trail-based recreation. It is becoming more and more difficult to find quiet areas to spend time in, with the increase in people, types of recreation and allowing people other than on foot alone to use motorized and other vehicles and methods in the back country that disturb the solitude and disrupt our natural land and environment.

I would like GMUG to provide maximum protection for wildlife in Gunnison County, my home county, especially in the above areas so near to me I mention above.

Please protect wildlife and wild areas to preserve quiet natural outdoor space for us.

Thank you.
