Title:

Comments: Dear Santa Fe Forest:

We cannot control burn our way out of global warming!

We do not need to be flooded with smoke in northern New Mexico. It makes a major impact on our health with P2.5 particles. It ruins tourism and the film industry.

FS needs to implement mechanical management of our forests as was proven in the East Mountains. It works. It is time to end control burning. Why is it that FS has to keep repeating stupidity?

And gets some goats.

Pete Myers

Santa Fe, NM
