Comments: Preservation of our natural water sources is vital to the survival of our area, Huerfano county, Colorado and every person and all wildlife downstream from us. I am REALLY distressed to see reservoirs throughout Colorado drained right down to their dirt riverbeds! Our Colorado rivers are some of the most important assets in North America, particularly waterways in the Grand Mesa, Uncompahgre and Gunnison National Forest. In the past,, they were all free-flowing rivers with outstandingly remarkable values must be found as eligible for ranching, wildlife survival, as well as scenic protections. In particular, I support Wild & Scenic eligibility for all the river, creek, aquifers and stream segments described at <https://ourcowaters.org/gmug/> These waters feature unique, outstanding, and popular outdoor recreation opportunities that are critical to our Colorado way of life. Most importantly, we must protect our water resources for the ranching and fruit growing commerce. If these endeavors fail, our state will be unable to assure a healthy and well-balanced future for ALL Coloradans. Thank you for your consideration.
