Title:

Comments: Our rivers are some of the most important assets in Colorado. Wild and scenic protections are the best way to preserve these critical assets to Colorado's special environment. And, bear in mind, it's these assets that provide the foundation for our recreation and tourist economies. They are critical to many small local businesses and to the economic well-being of rural Colorado. I support Wild & Scenic eligibility for all the river, creek, and stream segments described in the present proposal under your consideration. Thank you for your attention.
