First name: Linda kay

Last name: Marsh

Organization:

Title:

Comments: Your priorities are bass ackwards. Clean up the foredt floors and the deadwood kinling. 1. Encourage ranchers and farmers to graze the forest floor earlier, later and no fee. This cleans the ground so water runoff will soak into the earths water table for storage. It aireates and fertilizes the forest. 2. Remove dead forest. This prevents present and furure forest fires, creates jobs and retail. 3.Fresh forest gives off oxygen to clean the air and dead trees and dead foliage gives off carbonminoxide. 4. Remove all trees that devour our water like Russian Olive, Tamarisk and noxious weeds. LAST BUT NOT LEAST...ALL OF THE ABOVE WILL IMPROVE WILDLIFE LIVING CONDITIONS AND SURVIVAL. AND WILL GIVE OUR PPL WATER TO DRINK.
