Comments: Our rivers are some of the most important assets on the Grand Mesa Uncompahgre and Gunnison National Forest. All free-flowing rivers that are imperative for life both for the humans and the plants and animals. In particular, I support Wild & amp; Scenic eligibility for all the river, creek, and stream segments described at https://ourcowaters.org/gmug/ These waters are critical climate change refuges that we must protect in the face of a hotter, drier future, and they are also vital scientific research areas. Please protect these waterways for the survi of many into the future. Thank you for your consideration.
