Comments: I am generally against large scale expansion of Lutsen Mountain into areas adjacent to significant natural areas. Any scoping an analysis of this project needs to take into consideration significant natural areas managed by other agencies like the Minnesota DNR. Any analysis should also consider use of snowmaking chemicals and other potential impacts to water flowing into Lake superior even though this is not national forest property. Any analysis of Lutsen mountains financial need should require public access to their finances in order to determine that need.
