Comments: I am a big fan of lutsen mountains and the experience the mountain currently provides to skiers. The resort offers the best skiing in Minnesota and unparalleled views of Lake Superior and the superior national forest. However, I do not believe the resort should be expanded into moose mountain. This is public land that would be made private and would disturb natural ecosystems that are in place in the superior highlands. I agree with the expansion of the eagle mountain area, as I believe the resort does need another parking lot and chalet in order to sustain the growing number of skiers coming up to lutsen mountains. The eagle mountain expansive is only 36 acres and would add the necessary additions to grow the resort. I do not believe the moose mountain is needed and I would prefer for it to remain the untouched land that it currently is.
