Title:

Comments: I am submitting my strong objection to this expansion. This would degrade the maple and cedar forest, infringe on Treaty rights, harm wildlife and damage the already fragile area. It would limit access to the area, damage wild life corridors. It would take more water and use more fossil fuel. It is an ill timed and ill thought out expansion. I do not support this for the area, state or local community.

It is not needed, nor do we need this devastation to continue.
