Title:

Comments: I do not support the use of these public acres for the proposed private industry. The financial disclosures of the private company are not clear and the risk of further future expansion makes this project a huge future risk. The fact that the DEIS doesn't mention the SNA and Scherer Unit of the SNA shows risks affecting these areas is not adequately taken into consideration by the DEIS. Additionally the treaty rights of Ojibwe people are not adequately addressed in the DEIS and appear to be reduced or lost as opposed to being preserved as described in the Treaty of 1854.
