Comments: The most important part of this project is keeping the e-bikes out of the area. There has to be a remote camera system and bomb-proof signage outlawing e-bikes on any Forest trail that is designated as non-motorized.

The state section of this trail was advertised as non-motorized when it presented to the public. There was never a presentation made where it was outlined that e-bikes are considered non-motorized by the State Recreation officials. And now e-bikes are on the West side of the trail ruining the hunting and outdoor experience in the area. Whether the omission of e-bike allowance was made by ignorance or deception, I do not know.

Keep the e-bikes and other dirt bikes out of non-motorized trails on the Payette Forest.
