Dear Ms Schmidgall,

The reasons to proceed with the QMS Project are no longer compelling. Specifically I site the need to supply local mills with timber. I am an Oregon resident and personal know that the local saw mills now have adequate access to an abundant supply of product due to the recent fires and the inevitability of further wildfires.

Secondarily if the project should proceed I ask that you require a full environmental impact statement (EIS)

There remains a scant 1% of our native forest. It is imperative that all in units within the native forest never never be cut.

Thank you for your consideration of my comment to Stop the QMS Project timber sale.

Sincerely, Cynthia Rose
