Joan,

The QMS project has a major environmental impact and requires a full Environmental Impact Statement (EIS).

Please ensure that an EIS becomes available.

Also the QMS project is far too large, and must be broken up into a number of projects of 10 or less units, each with its own EIS.

Supplying local mills with timber, has already been served by timber from recent fires and is no longer valid. It likely will continue to be served by future, inevitable wildfires which are the new normal. Stop serving Wall Street owner timber companies, and instead serve the people who own the National Forest, we the Citizens and the Taxpayers.

All units in the QMS that are native forests that have never been cut must be dropped.

I do support scientifically sound, ecological restoration thinning in the plantations.

Marjorie Stuart

Citizen of Oregon and the United States and a Taxpayer
