With Great concern here are our public comments on the proposed

We believe that

1. There must be an Environmental Impact Statement (EIS). At the very least.
2. This project must be broken up into a number of projects of 10 or less units, each with its own EIS.
3. The first Purpose and Need, supplying local mills with timber, has already been served by timber from recent fires and is no longer valid. It likely will continue to be served by future, inevitable wildfires which are the new normal.
4. All units in native forests never cut must be dropped.
5. We support scientifically sound, ecological restoration thinning in the plantations.
6. That Suzanne Simmonds book...Finding the Mother Tree should be required reading for All on your staff.
