Comments: WE NEED MORE TRAILS

It is great to see multiple agencies collaborating on land use and trails in Valley County. Mountain biking has become such a large part of McCall's economic resource since I moved here from Boise in 2004. In addition to this great economic impact, creating more trails is such a great way to get folks outside and allow them access to our public lands. With the ever growing population we need more trails of all levels with access from town.
