Comments: The expansion of the Payette Lake Trail to include the East side of the lake will be a major upgrade to the trail system and offer many recreational benefits to the community. Folding into the existing trail infrastructure is a wise and sound decision, obviating the need for additional construction and parking. After seeing the results from Phase 1 of the PLT construction on the West side, it seems like this expansion is the natural continuation of that project.

A fully non-motorized hikeable/bikeable trail encompassing the lake will be a unique and novel attraction for the area. It should be built in the same style and to the same level of difficulty as the existing Payette Rim/Lake trail in order to accommodate a wide range of skill levels and incorporate challenging technical features.
