Comments: As one of the owners of Gravity Sports, a local mountain bike retail store, I am writing in support of the proposed ammendment to the Payette Lake Trail project. The proposed route accomplishes the original vision of the PLT project while rerouting through the most ecologically sustainable terrain possible, utilizing many miles of existing roads or trails and existing parking facilities. This area is some of the most beautiful, and most accessible terrain in the McCall area and will be enjoyed by numerous non-motorized user groups. Further,the completion of this trail will create a world class trail system comparable Tahoe's Rim Trail and will benefit the communities of Valley County enormously.
