First name: Eric

Last name: Bartrand

Organization: WA State Dept. Fish and Wildlife

Title: Fish and Wildlife Biologist

Comments: 1.The proposed tower location is within a Category 1 (reproductive pair) Northern Spotted Owl (NSO) Circle. Tree removal should be kept minimal. It is outside of NSO critical habitat, but less than a mile from an old (its not currently an active) site center. In the review, please ensure that the proposed action is not having impacts on the NSO circle.

2.A bird-friendly design can be incorporated. Particularly to have no guy wires. Advise to follow USFWS guidelines for towers: <https://www.fws.gov/midwest/endangered/section7/telecomguidance.html>

3.The installation's road access area is near mapped Elk calving areas. Please consider elk migration and calving in both the road work and operations.
